PREFACE

The first attempt to produce something entirely new can be both delightful and traumatic. Compiling information for this Directory has been both. The pleasure arises from the satisfaction of seeing and contributing to the creation of something worthwhile. I hope that each of you who completed a questionnaire will share in some small way the feeling of joy which you deserve.

The trauma is largely due to designing a questionnaire which, in the clear light of hindsight, was somewhat less than optimum. A check-off format would not only have made it easier for you to complete but would have greatly improved the standardization of responses. Many of you will doubtless feel undeserved disappointment at the heavy editorial hand which I exerted to standardize categories. Since I could delete easily but add information only with great difficulty, the loss of information will be a shock to some and a sadness to many. At this stage I can only apologize, and assure you that next year's effort will be better.

In conclusion, I wish to thank the Board of Directors of APMS for their support, despite the many uncertainties of a first effort. Wayne Miller, Lou Guerra and Bill Rushing have been especially helpful. I also wish to express my appreciation for Ann and Ron Mizerak of Randam Assistance. The data processing part of this project could have been agony but was unmitigated pleasure due to their cheerful attitude and willingness to cooperate above and beyond the call of their contract.
